

WHY I WANT TO BE A NURSE

I have wanted to be a nurse since second grade. I've been reading books about nursing and medicine, and have learned much.

The reason I want to be a nurse is so I can help people and promote a healthy lifestyle for everyone.

To me, a nurse is a person who is willing to learn and help others. A nurse works with doctors and patients. Nurses take blood, check blood pressure and medications. Nurses also help people while they are sick or recovering from an illness or accident. Nurses help people believe in recovering and that they can do it.
